SOUNDS OF SCIENCE WINS CITATION FOR EFFECTIVE EDUCATIONAL PROGRAMMING

MSOE's "Sounds of Science," heard three times weekly over Station WISN, has been awarded a citation as one of the most effective college-produced programs on radio. The presentation was made by the American College Public Relations' Association at its annual convention July 3 in Denver, Colo.

Only six of ACPRA's 200 members were cited for their work with radio tapes. They include Pennsylvania State, University of California, and Washington State among schools enrolling 3,000 or more students; and Occidental College, MSOE and Simmons College among schools enrolling less than 3,000.

"Sounds of Science," moderated by WISN program director Tom Lambert, consists of five-minute capsule discussions by MSOE faculty members on various aspects of science. Its purpose is to keep the public abreast of our nation's scientific achievements. The program is heard at 12:25 and 8:25 p.m. Saturday, and at 8:25 p.m. Sunday.
